Akari System

Techno fusion from Japan □□□□□

Biography

AKARI SYSTEM, also known as AKASYS, is a collaborative techno project created by RINKADINK and AIRI [1]. Based in Yamanashi, Japan, the duo has been producing together since 2020 [2]. RINKADINK is Werner van Jaarsveld, a South African-born producer and DJ who began performing in his early teens before moving to London in 2000 [3]. His career spans more than 25 years, during which he has released numerous tracks and appeared as a headliner at festivals and clubs around the world [4]. AIRI is Felix Ando, a Swiss-Japanese producer born in Switzerland to a Swiss father and Japanese mother [5]. Classically trained as a violinist during his childhood in Germany, he has been active as an electronic musician since 2004 and has performed at festivals across the globe [6]. Together, RINKADINK and AIRI channel their contrasting backgrounds into the uncompromising sound of AKARI SYSTEM [7]. The duo combines decades of experience in electronic music with a forward-thinking approach to techno [8]. Their music is characterized by immersive atmospheres, powerful bass, intricate sound design, and intelligent composition [9].
